PROFESSIONAL SUMMARY

Fullstack AI Developer and Computer Science graduate (AIUB, CGPA 3.76/4.0) with hands-on experience across computer vision, NLP, LLM-driven systems, and production full-stack development. Independently shipped ML pipelines achieving up to 95.6% accuracy, built RAG chatbots and autonomous AI agents, and deployed scalable web systems using React, Node.js, PostgreSQL, Docker, and Redis. Currently building AI automation workflows for real clients at WebtrixLab. Honest about what I don't know, fast at learning what I need. Two-time Dean's Award recipient.

EDUCATION

2022 – 2025 **BSc in Computer Science & Engineering, AIUB** CGPA: 3.76/4.0
2020 **HSC, Chandpur Govt. College** GPA: 5.00/5.00

AWARDS & CERTIFICATIONS

Dean's Award — Fall 2023–24, Fall 2024–25 (AIUB) | Cisco IT Essentials

EXPERIENCE

AI Automation & Full Stack Developer 2025 – Present
WebtrixLab Part-time, Remote

- Building LLM-driven automation workflows using n8n for real clients: Messenger AI agent with persistent memory, Gemini Vision auto-responder, Gmail HR recruitment pipeline, and Telegram job-alert bot with custom scoring.
- Developing full-stack web applications using Next.js, Node.js, and MongoDB, deploying and debugging production systems independently.

Software Engineer Intern Feb 2025 – May 2025
NN Services & Engineering Ltd (NNSEL) Dhaka, Bangladesh

- Built production REST APIs with Node.js/Express and PostgreSQL, developed React frontends, and shipped features from problem to working system within sprint cycles.

AI & ML PROJECTS

RAG Chatbot — Document Q&A Python, TF-IDF, Gemini API, Streamlit [Live] [GitHub]
• LLM-driven decision system: TF-IDF cosine similarity retrieval from PDFs + Gemini LLM for context-grounded answers. Built, deployed, and running on Streamlit Cloud.

Churn Radar Next.js, TypeScript, FastAPI, scikit-learn [GitHub]
• Full-stack ML application: Random Forest pipeline (ROC-AUC 0.80), FastAPI backend, Next.js dashboard with auto-generated schema-driven forms and bulk CSV upload.

RidePrice BD — ML Fare Estimator Python, scikit-learn, Flask, JavaScript [Live] [GitHub]
• Regression model trained on Dhaka transport data with feature engineering — Flask REST API on Render, client-side inference for zero-latency predictions across 76+ locations.

Dhaka Traffic Predictor Next.js, TypeScript, MongoDB, Redis, BullMQ, Gemini AI [GitHub]
• Scalable AI platform: Redis caching, BullMQ job queuing, JWT auth with refresh token rotation, Zod-validated APIs, and Gemini AI natural-language route explanations.

Task Manager React 19, Node.js, PostgreSQL, JWT, Docker [Live] [GitHub]
• Production full-stack app: JWT auth, raw PostgreSQL SQL, Dockerised backend — deployed and running at scale on Vercel.

RESEARCH EXPERIENCE

Brain Tumor Segmentation & Classification Deep Learning, MRI
• Multi-task deep learning detection pipeline achieving **95.6% accuracy** across multiple tumor classes on MRI data.

Explainable Osteoporosis Detection DenseNet121, Grad-CAM, Computer Vision
• Computer vision recognition pipeline achieving **87.5% recall** on knee X-ray classification with Grad-CAM visualisation for interpretability.

Waste Image Classification EfficientNet-B3, Transfer Learning
• **94% accuracy** on multi-class waste image classification using EfficientNet-B3 with transfer learning.

Sentiment-Based Product Grouping NLP, TF-IDF, DBSCAN, PCA
• NLP pipeline: TF-IDF vectorisation, DBSCAN clustering, PCA dimensionality reduction for sentiment-driven product segmentation.

TECHNICAL SKILLS

AI & ML	Computer Vision, NLP, LLM Integration, RAG, Gemini API, TensorFlow, scikit-learn, OpenCV
Automation	n8n, GitHub Actions (CI/CD), Telegram API, Gmail API, Prompt Engineering
Full Stack	React, Next.js, Node.js, Express, FastAPI, Flask, TypeScript, JavaScript, Tailwind CSS
Infrastructure	Docker, Redis, BullMQ, PostgreSQL, MongoDB, MySQL, SQL Server
Languages	Python, TypeScript, JavaScript, C#, PHP, Java, C++, SQL
Tools	Git, GitHub, Postman, Vercel, Render, Netlify, Streamlit
