Takbir Zaman Bhuiyan

TakbirZaman | takbir-zaman-bhuiyan | Portfolio | takbirzamanbhuiyan@gmail.com | 01631-107100

Professional Summary

Full-Stack Developer and Computer Science graduate (AIUB, CGPA 3.76/4.0) with experience delivering web applications from requirements through deployment. Builds with Node.js, React, PostgreSQL, Docker, and GitHub Actions. Uses Claude, GitHub Copilot, Lovable, and OpenCode to support implementation, code review, and debugging, with careful validation of generated code. Experience includes REST API development, database integration, authentication, and deployment. Currently develops full-stack client applications at WebtrixLab. Two-time Dean's Award recipient.

Education

2022 – 2026 **BSc in Computer Science & Engineering, AIUB** CGPA: 3.76/4.0

Awards

Dean's Award — Fall 2023–24, Fall 2024–25 (AIUB) | Cisco IT Essentials

Experience

AI Automation & Full Stack Developer *2025 – Present*
WebtrixLab *Part-time, Remote*

- Develop and deploy full-stack client applications using Next.js, Node.js, and MongoDB, taking ownership of features from requirements and implementation through deployment.
- Use Claude, GitHub Copilot, and Lovable to support implementation, review, and debugging, validating AI-generated code before integrating it into application features.

Software Engineer Intern *Feb 2025 – May 2025*
NN Services & Engineering Ltd (NNSEL) *Dhaka, Bangladesh*

- Developed Node.js/Express REST APIs backed by PostgreSQL and built React interfaces for production applications, collaborating through code reviews and agile development sprints.

Projects

TechCommerce — Full Stack SaaS E-Commerce *FastAPI, Next.js 14, TypeScript, SQLAlchemy* [Live] [GitHub]

- Built and deployed an e-commerce platform with a FastAPI backend, SQLAlchemy ORM, and Next.js 14/TypeScript frontend. Implemented JWT authentication, session-based carts, product, coupon, and order administration, and an AI product advisor, managing development from planning through deployment.

Task Manager *React 19, Node.js, Express, PostgreSQL, JWT, Docker* [Live] [GitHub]

- Built a full-stack task manager with JWT authentication, per-user data isolation, CRUD operations, filtering, sorting, and CSV export. Used raw PostgreSQL queries and a Dockerized backend deployed the application online.

Construction Tracker *React, Node.js, Express, PostgreSQL* [Live] [GitHub]

- Built a project management application with role-based access, task assignment, budget monitoring, and material tracking. Managed development and deployment on Render.

Dhaka Traffic Predictor *Next.js, TypeScript, MongoDB, Redis, Gemini AI* [GitHub]

- Developed a full-stack application with Redis caching, BullMQ background jobs, JWT authentication with refresh-token rotation, Zod-validated APIs, and Gemini AI integration.

RidePrice BD — ML Fare Estimator *Python, Flask, JavaScript* [Live] [GitHub]

- Built a fare estimation application combining model training, a Flask REST API, and a responsive JavaScript frontend. Managed the project from initial planning through deployment.

ConnectHub — Social Platform *PHP (OOP), MySQL* [Live] [GitHub]

- Built and deployed a PHP MVC social platform with role-based access, authentication, and a normalized MySQL schema, taking ownership of development and delivery.

Research Experience

Brain Tumor Segmentation & Classification *Deep Learning, MRI*

- Multi-task deep learning framework achieving **95.6% accuracy** across multiple tumor classes.

Explainable Osteoporosis Detection *DenseNet121, Grad-CAM*

- Computer vision pipeline achieving **87.5% recall** with Grad-CAM visualisation.

Technical Skills

Full Stack	React, Next.js, Node.js, Express, FastAPI, Flask, TypeScript, JavaScript, Tailwind CSS
Databases	PostgreSQL, MySQL, MongoDB, Redis, SQL Server
Auth & APIs	JWT, REST API Design, OAuth patterns, Zod validation
DevOps	Docker, GitHub Actions (CI/CD), Vercel, Render, Netlify
AI Coding Tools	Claude, GitHub Copilot, Lovable, OpenCode, ChatGPT, Gemini
AI & Automation	Gemini API, RAG Pipelines, n8n, LLM Integration, Prompt Engineering
Languages	JavaScript, TypeScript, Python, C#, PHP, SQL
